

Snowflake Ornaments

Difficulty Level: Easy

What you need

- 1 Sheet of Plastic Canvas, Clear, 7 Count
- 1 Ball of Medium Weight Yarn
- Plastic Canvas Needle
- 14 mm Wooden Beads

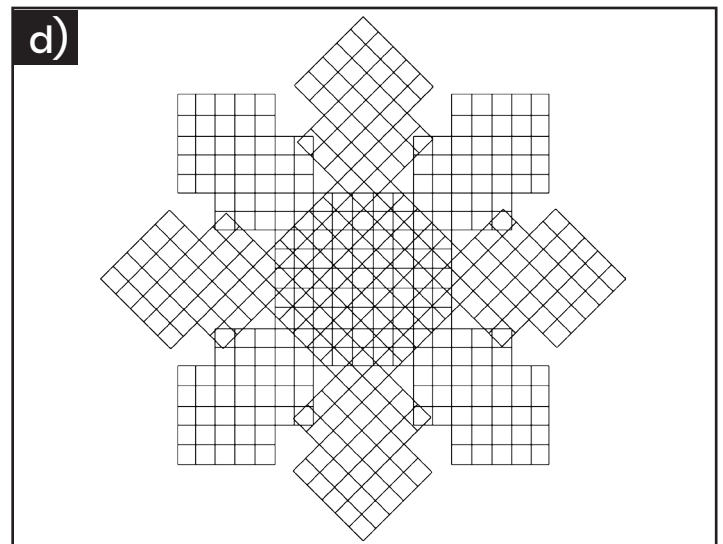

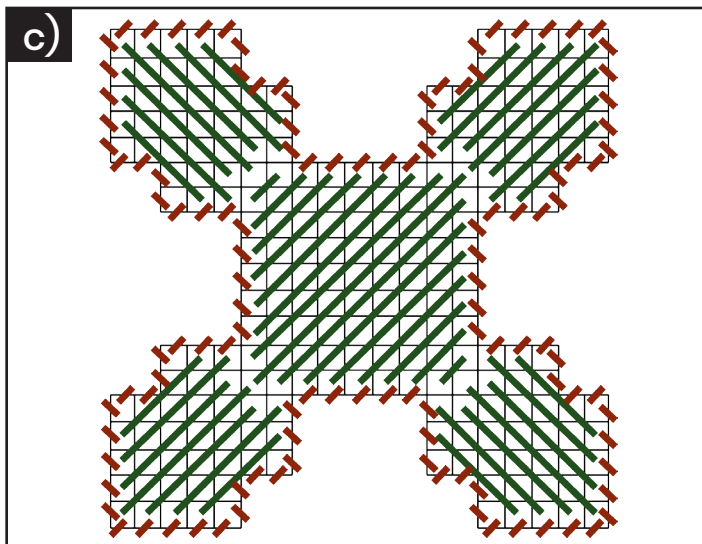

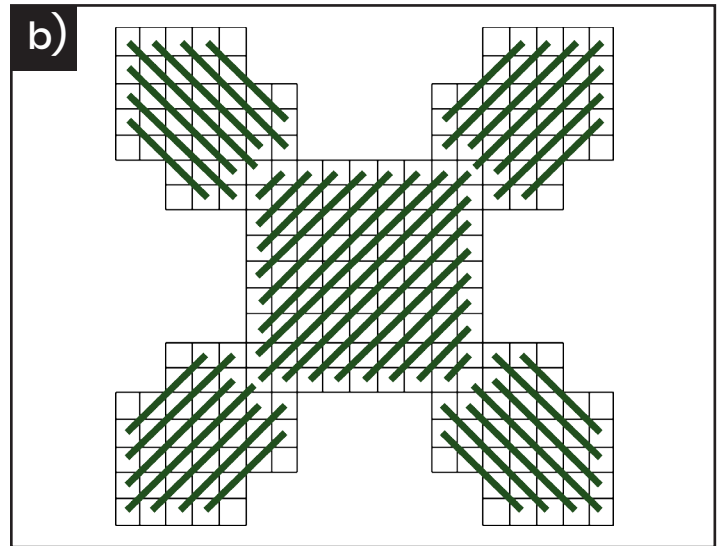

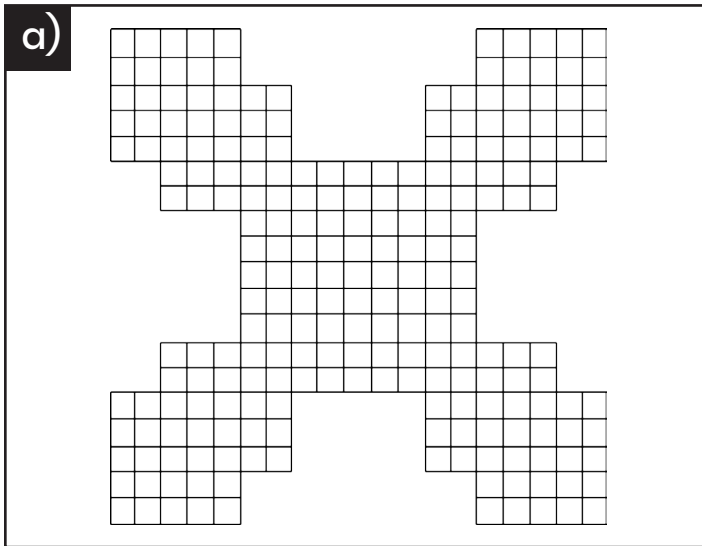

Tools:

- Scissors
- Ruler or Measuring Tape

Instructions

Style A:

- Cut 2 pieces of plastic canvas using the guide shown.
- Use yarn to stitch the lines on each piece, as shown in the guide, weaving in ends as you go.
- Overcast stitch around all the edges of both pieces.
- Turn one piece a quarter turn so the points are offset. Place the pieces wrong sides together.
- Carefully tuck each corner of the top piece between the corners of the bottom piece. It will start to form a 3D snowflake.
- Stitch a loop in one corner for hanging. Your ornament is complete.

Instructions

Style B:

- Cut 6 strips of plastic canvas, each 3 holes wide by 17 holes long.
- With the yarn, start at the bottom right corner and overcast stitch up one long edge, leaving a 1" tail.
- Fold the strip in half (short ends together) and overcast the short ends, securing the tail as you go.
- Continue overcasting the other long edge. Weave in the end and trim the extra yarn. Repeat to make 6 teardrop shapes.
- Thread a long piece of yarn on your needle. For each teardrop, count 6 holes down from the folded edge.
- Insert the needle through one side, add a bead, then go through the other side at the same point. Repeat for all 6 teardrops on that same long piece of yarn.
- Pull the teardrops into a circle and tie the ends together securely. Use the extra yarn to make a loop for hanging, then trim any excess.
