Twist MACRAME

Hanging Basket Macrame Pattern

MATERIALS:

- 1 ball of Twist Macrame Yarn
- 1 wooden ring 1.38”
- A secure place to hang your project while working

MACRAME PATTERN:

- Cut 130” of yarn.
- To cover the ring: Thread the wooden ring onto the cord so it sits at the halfway point. Wrap both ends of the cord around the ring in opposite directions until the ring is covered, then tie the two ends together in a knot.
- Cut 3 pieces of yarn that are 126” long and tie all 3 on the ring beside the previous knot.
- Take the 4 middle strands and tie a square knot about ¾” down from the ring.
- Tie a square knot with the 4 strands on the left about ¾” down.
- Repeat on the right side with the 4 strands on the right
- Make a square knot with the 4 middle strands ¾” down
- Take 120” of a new strand of yarn and use it to create a square knot with the 2 strands on the left side of the project
- Repeat with another strand of the same length on the right side.
- Repeat the pattern by creating alternating square knots and adding new strands to the 2 outer strands on the right and left side. This creates an increase in the width.
- Repeat until you have completed 11 rows of increases with the new strands on the ends.
- For the next row, take the two strands on each side and bring them together to make a square knot. Joining the two sides together
- Continue making evenly spaced alternating square knots for 8 more rows all around
- Get a 30” length of yarn and create a gathering knot joining all the remaining ends together
- Trim all the ends at about 6” or desired length to finish.
