

DIY FELT BABY SLIPPERS

Materials

- Felt
- Fleece (Lining)
- Baby Suede Slipper Soles
- Embroidery Thread
- Hand Stitch Needle

* Use a 1/4" seam allowance

1.

Using the pattern provided, cut four pieces out of felt and four pieces out of fleece. Make sure to fold the fabric when cutting to ensure two of the four pieces are reflected.

2.

With right sides together, sew each piece of fleece to a piece of felt. Sew across the top of the boot and around the curve until the notch. Turn right side out.

3.

With felt sides together, sew the two sides of the boot together by stitching down the back. Finish the front of the boot by stitching around the toe until the notch. Trim any extra seam allowance. Turn right side out.

4.

Hand stitch the boot to the sole. Create a cross stitch ('X' pattern) by bringing the needle out through a perforated hole and diagonally across to the fabric above the next hole. Bring the thread back through the fabric above the first hole and finish the X by bringing the needle diagonally as shown above
